# All-in-one software encoding and transcoding for efficient broadcast and OTT video delivery.

Flexible • Low latency • Cost-effective

The rapid transformation of consumer's behavior in the past few yers has changed the way how broadcasters think, deliver and monetize their services. Unfortunately, **the workflows tend to be complicated, inflexible and costly.**

## IT IS TIME FOR CHANGE!

# Software simplifies workflows.

And saves money.

Comprimato combines the functionality of several devices into a single software.

As a result, the workflow is simplified, latency is reduced and **expensive single-purpose hardware is needless.**

[comprimato]

## Live transcoder

Live Transcoder is a GPU-powered software for professional video encoding and transcoding.

It supports for direct compatibility with high-quality contribution formats (JPEG2000, H.264) and processes them into **formats suitable for broadcast or OTT distribution** (H.264, HEVC, AVC).

Easy-to-scale software solution offers an **exceptional video clarity in a very dense package** (up to 70 FullHD 60FPS streams per 1 RU) and provides an extensive video, audio, and metadata processing capability.

## SOFTWARE PROTECTS YOUR INVESTMENT.

<h3>Simple Scalability</h3> <p>Never lock down to one codec or resolution.</p>	<h3>Easy Integration</h3> <p>Fit to existing workflows without any disruption.</p>	<h3>Multiple Deployment</h3> <p>Running on COTS allows for on-premise, cloud or hybrid deployment.</p>	<h3>Flexible Pricing</h3> <p>Pay as you go pricing offers for instant scaling based on current needs.</p>
